## Tank Container Specification

Tankspan Leasing

Customer Order No Customer Serial No Quantity Option		<b>1 anks</b> : - : 30 off : -	Contract No Enquiry No G.A. Drg. No Works No's	: : :	CN 1 E9199 -	
Tank Type	:	Swapbody, IMO 1,	UN T11			
<b>Overall Dimension</b>	:	7450mm x 2550mm	n x 2670mm			
Capacity	:	33,000 Ltr. +/- 1%				
Maximum Gross Weight	:	36,000 Kgs				
Tare	:	4,130 Kgs +/- 3%				
Working Pressure	:	3 Bar				
Test Pressure	:	6.00 Bar				
External Vacuum Pressur	e :	0.4 Bar				
<b>Calculation Pressure</b>	:	N/A				
Design Temperature	:	130°C				
Vessel Material	:	316 Stainless Steel; Shell: 4.2mm min	Carbon Content < 0.03% Co Ends: 5mm min B/F	old ro	olled 2B fin	lish.
Stiffening Rings	:	304 Stainless Steel	4 off			
Frame Material	:		3S 4360, Grade 43C. rame and vessel stainless stee	1		
Frame Design	:	castings in the base. base at ISO 20ft cer	frame with corner castings to An extra set (4 No.) of 2.55 htre with the front units at the Container will fit on to Drop	m Co fron	orner Castin t of the 7.4	ngs are fitted to the 5mtr. dimension to
<b>Corner Castings</b>	:	See Frame Design				
Load Transfer Areas	:	N/A				
Straddle Lift	:	N/A				
End Protection Side Lift Pressure Vessel Code Radiography	:	N/A ASME VIII Div 1 Head Seam Full; H	4 stainless steel tube. Remova ead/Shell Spot	able	Unit fitted	to rear of tank.
Inspection Agency Test Requirements Type Approval No Cargo Carried	:	Bureau Veritas - - Multi-purpose				
Approvals	•		UN T 11), TIR, UIC, CSC			

## **<u>Fittings/Accessories</u>** E9199

Manlid	:	1 off 500mm,6 Point,6 Bar Test Pendle Pressed Manlid Cover & Pressed neckring assembly with 8 x104mm comp ring, profiled to suit a tank radius range of 1200mm manufactured in 316 st/st with Naval Brass Swingbolts. FV 8PB/5510118P	
Cleaning Manlid	:	1 off 300mm 4pt 6Bar Test Manlid/Neckring Assembly comprising Manlid suitable for 4 Bar MAWP, new style Pressed Neckring and 4 off Stainless Steel Swingbolts with Naval Brass Handnuts. Contact parts Manufactured in 316 Stainless Steel. FV 8PB/2750118P	
Safety Relief Valves	:	1 off 80mm Super Maxi Highflow Relief Valve set at 63.8 PSIG (4.4bar) Paralle bore with Flange details of DIN 80 PN 6 c/w 1/4" BSP Gauge tapping. Manufactured in 316 st/st with fortyt seals. Fitted to tank top at rear of manlid, se to discharge at 4.4 bar. Provision for future fitting of bursting disc. FV 013/16300801	
Airline	:	1.5"BSP MKIII Air Inlet Valve 10 Bar MAWP at 205 Deg C, manufactured in 316 st/st with PTFE main seals & TIR which operates in a shearing plane. Fitted with a Gauze Filter. Outlet is 1_" BSP and fitted with a 1_" to 2" BSP adaptor, drip cap and retaining wire. Wire gauze fitted and gauge connection plugged. Airline positioned to rear of 500mm manway and opposite 3" P/V. FV 530/0000F Adaptor F/V 10252SS	
Gas Return Valve	:	N/A	
Any other specific fittings:		N/A	
a: Top Outlet System	:	N/A	
b: Sump Pot	:	N/A	
Top Outlet Provision	:	1 off DN 100 Tank Pad fitted to shell at rear end blanked off with bolted flange. Fitted with full face gasket.	
Bottom Outlet	:	1 off 80mm bore tank pad, 80mm,45 Deg Composite Bottom Outlet System Comprising 3" 45 Deg Hi-Lift Footvalve and 3" Clamped Butterfly Valve (with straight handle), with 3" BSP outlet with Cap and Seal. Manufactured in 316 Stainless Steel with Fortyt and PTFE main seals. Drip cap fitted with chain retaine to prevent cap falling below frame. FV 888/8263681B	
<b>Remote Closure</b>	:	CPV type fitted to right hand side of tank. $_{3}$ length of tank.	
St.St. Calibration Chart	:	Fitted adjacent to manlid; calibration in cm's and ltr's	
<b>Computer Calibration</b>		Computer print-out available.	
Chart Dipstick	:	Dipstick holder fitted only.

14.	Steam Heating	:	8 runs of 100mm wide 304 stainless steel channels welded to base of tank. Inlet/Outlet pipe screwed and capped 1" BSP stainless steel cap & chain. Pipework configured for future fitting of glycol system including vertical pipe for air release. Steam heated bottom outlet pad integrated into steam manifold at rear of tank.		
			Effective Heating Area.: 9m <sup>2</sup> Working Pressure: 3 Bar		
15.	Gasket Material	:	Manlids:Braided PTFE 14mm x 14mm x 1.75m (500mm)Braided PTFE 14mm x 14mm x 1.0m (300mm)		
			Outlet Valves:PTFE envelopeDripcap on steam tubes:PTFE		
16.	Electrical Heating	:	N/A		
17.	Insulation	:	80mm 24kg/m <sup>3</sup> compressed to 50mm maximum thickness of aluminium foil backed rockwool reduced at sides to approx. 30mm.		
18.	Cladding	:	Shell:2mm White GRPEnds:GRP White		
19.	Analog Thermometer	:	Surface sensing bulb clamped to rear dish above bottom outlet. Scale 0-200°C Dual Scale °C and °F.		
20.	Digital Thermometer	:	N/A		
21.	Walkway	:	One off 460mm minimum wide non-slip aluminium open grid panel full length on both sides of tank; hand grip in walkway at ladder end of panel for easy access. Cross walkways at each spill enclosure. _ length St. St. Collapsible Handrail fitted on right hand side.		
22.	Ladder	:	Aluminium, fitted at rear right hand side.		
23.	Spill Enclosure without lid	:	500mm Manway To enclose manlid, PV valve and Airline, fabricated from stainless steel;		
			<u>300mm Manway</u>		
24.	Drainage Pipes	:	<b>To enclose 300mm manlid – and top discharge provision.</b> Stainless steel pipes from Spill Enclosure terminating at base of tank running		
25a	Rear Compartment	:	below insulation/cladding. Exposed shell area coated with GRP as insulator. 2mm thick stainless steel enclosinserted into rear GRP dish and welded directly to rear stainless steel dish to prote bottom outlet.		
25b 26.	Side Compartment Side Protection		N/A N/A		
27.	Top/bottom Frames	:	N/A		
28. 20	Baffles Comportmont Tonks	:	N/A N/A		
29.	<b>Compartment Tanks</b>	•	N/A		

## **Fittings/Accessories** E9199

tings/Accessor	<u>ie</u>	<u>S</u> E9199
Internal Finish	:	Longitudinal welds rolled flat; circumferential welds ground and polished; surface chemically treated and passivated; polished areas to 120 grit.
External Finish	:	Shotblast : Carbon steel to S.A. 2.5
		Primer : Hempels 4641Acrylic RAL 7035
		Paint : Hempels 4641Acrylic Solvent based
		Total dft 125µ
